Bi-weekly repetition doesn't work

Description			
Apparently the bi-weekly repetition doesn't work in the personal calendar. I just get the first occurrence then nothing more (I'm trying with one repetitive weekly event of 1 hour which displays fine + one 2-days long bi-weekly repeated event).

- Status changed from New to Rejected - Abandoned

Apparently I had selected the wrong end date (the same day, same year) so it hadn't been repeated at all. This being said, even without publishing to anybody else, I get a white screen when trying to publish it (but it gets created).
