#### History

What does it mean "There are some bugs that occurs when export the course and import in other course."  
From a zip file (Backup and import)?? or from the "Copy training" link??

I tried to reproduce the agenda error but it works well for me.  
Tried to create a new backup file and do it again and update your repository.

What's the problem with the announcement tool? I do not get the image.

Please explain the bugs in more detail.

The forum + learning path is a bug. I will fix it...

The forum tool is not been exported. I mean, this should be a **feature** for the 1.8.7.1.

I'm fixing the bug when adding an Assignment + an agenda event see :

\*The forum tool + the LP should be a feature for the 1.8.7.1.

For me is **not** a bug, if there is a duplicated of the examples when importing a course.

I do not consider the description(book image) problem as a bug. It depends of the html ninja skills of the teacher...
