Description			
Is it possible to underline the term 'Shared objects' when it is selected. Just as the term 'Repository' is underlined when it is selected. Otherwise you can't notice the difference when you are switching.			

History

Objects I have shared are not shown here. I do not know whether objects that some one else shares with me would be shown here, in other words: what is the scope of 'shared objects'

- Status changed from New to Bug resolved

Seems like all the rest of the items in the tree are not underlined too. Closing this one.
