I think the files are linked to the blog tool (that's the only tool which used them at some point). I know the wiki tool was supposed to use them as well, but I'm not quite sure...

```
$ rgrep "permissions/" .
./inc/lib/blog.lib.php: require_once(api_get_path(SYS_CODE_PATH).'permissions/blog_permissions.inc.php');
./inc/lib/main_api.lib.php: require_once api_get_path(SYS_CODE_PATH).'permissions/permissions_functions.inc.php';
./permissions/permissions_functions.inc.php: echo $row['role_name']." <a href="/../permissions/roles.php?role_id=".$row['role_id']."&amp;scope=course">\n";<br />
```
