I think the files are linked to the blog tool (that's the only tool which used them at some point). I know the wiki tool was supposed to use them as well, but I'm not quite sure...

```
$ rgrep "permissions/" .
./inc/lib/blog.lib.php:         require_once(api_get_path(SYS_CODE_PATH)..'permissions/blog_permissions.inc.php'
);
./inc/lib/main_api.lib.php:     require_once api_get_path(SYS_CODE_PATH)..'permissions/permissions_functions
.inc.php';
./permissions/permissions_functions.inc.php:     echo $row['role_name']. " <a href=\"../permissions/roles.ph
p?role_id=".$row['role_id']."&scope=course\"><img src=\"../img/edit.gif\" /></a><br />\n";
```
