<b>Target version:</b>	1.0.0	<b>Spent time:</b>	0.00 hour
<b>Complexity:</b>	Normal		

#### Description

bug: the rights for creation of content object can not be set because I get the following error  
"[=Repository=InvalidDataRetrievedFromDatabase=]" (xdebug: Exception: Invalid data retrieved from database in /var/www/POINTCARRE2\_SERVER\_CLONE/repository/lib/data\_manager/database\_repository\_data\_manager.class.php on line 78.)

usability: Users have by default no rights to create any content objects. The rights have to be set for every type separately, I think we should look for a method to make this more user-friendly (since we already have 66 different content-objects that are installed automatically)

#### History

##### #1 - 03/09/2010 10:23 - Nathalie Blocry

attention: this rights editing sometimes seems to work fine when testing, but instead of setting the rights for the content-object-type, you are actually setting the rights on a content-object with the same ID (if such a content object exist. on a new installation, without content-objects you get the "InvalidDataRetrievedFromDatabase"-error because the content-object doesn't exist (while the type does exist).

##### #2 - 06/09/2010 09:14 - Sven Vanpoucke

- Category set to 4

- Target version set to 18

##### #3 - 07/09/2010 10:13 - a b

- Assignee set to a b

##### #4 - 07/09/2010 11:19 - a b

- Status changed from New to Needs testing

- % Done changed from 0 to 100

In reference to the usability issue: If you set the rights on the root (by clicking the link on the action bar) you can set the add/view right which then will be inherited by all the types.

##### #5 - 25/01/2011 14:58 - Stefaan Vanbillemont

- Status changed from Needs testing to Bug resolved

##### #6 - 01/04/2011 14:54 - Stefaan Vanbillemont

- Project changed from Chamilo LCMS Connect to Repository

- Category deleted (4)

##### #7 - 14/04/2011 13:41 - Stefaan Vanbillemont

- Target version changed from 18 to 1.0.0
