#### Description

##### System info:

MS Windows XP Pro, Version 2002, SP3

MS Windows IE 8.0.6001.18702

-----  
Trying to create a new tab for the homepage will result in an unending loading animation.  
After refreshing the page, the following error occurs: 'Failed to load "dummy" block.'

After clearing the cache, the same error message will occur after logging in on the same account.  
The account can't be used anymore and needs to be deleted, and recreated, through an admin account.
