Description			
Some submanagers aren't real submanagers right now and don't use the correct method to launch them (rightseditor/categorymanager)			

History

#1 - 16/09/2010 09:39 - Hans De Bisschop

- Assignee set to Hans De Bisschop

Considering I was already working on that AND converting them all to the new, simplified, launching structure, I should finish the job as well ;-)

#2 - 28/11/2010 11:05 - Hans De Bisschop

- Target version changed from 3 to 21

#3 - 08/02/2011 11:25 - Laurent Opprecht

Can we have a Run method in the submanager to launch components?

I have a situation - Fedora External Repository - where I need to overwrite the Run method to dispatch to different components based on Fedora's configuration. Currently it's not possible because the components are launched from a static method.

It should be possible to use the Run parent's method without having to redefine for every sub manager.

Wondering too if would be possible to compose managers instead of having managers and submanagers. Using the same api for both? Just an idea though.

#4 - 01/04/2011 14:59 - Stefaan Vanbillemont

- Project changed from Chamilo LCMS Connect to Repository

- Category deleted (22)

#5 - 14/04/2011 13:48 - Stefaan Vanbillemont

- Target version changed from 21 to 2.1.0

#6 - 16/06/2011 14:39 - Stefaan Vanbillemont

- Target version changed from 2.1.0 to 55

#7 - 17/06/2011 13:39 - Stefaan Vanbillemont

- Target version changed from 55 to Backlog (default)
