

Repository - Feature #2031

when using LDAP, an empty record is written in the user table

19/09/2010 18:07 - Olivier Sourie

Status:	Bug resolved	Start date:	19/09/2010
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 3	Spent time:	0.00 hour
Complexity:	Normal		
Description			
<p>At Howest we use connection to an LDAP-server to authenticate our users. Accessing user information with the LDAP-parameters in Chamilo 2.0 works fine. However, it goes wrong when the default properties of the User Object in the 'create' method of the database Class are used: there is no data of the user in these properties.</p>

Fixed the ldap problems

<http://code.google.com/p/chamilo/source/detail?r=3f04b4cc2cd5d64877b4b94ac1cacf841c89fb1e&repo=chamilo>

#2 - 20/09/2010 09:23 - Hans De Bisschop

- Status changed from Needs testing to Assigned
- % Done changed from 100 to 50

This is only a partial fix, something should be done about the hardcoded ldap property names too.

#3 - 20/09/2010 09:30 - Sven Vanpoucke

The hardcoded properties are separated in a parser class, when using the ldap connection, one needs to adapt the parser class to connect.

#4 - 20/09/2010 10:29 - Sven Vanpoucke

- Status changed from Assigned to New
- Assignee deleted (Sven Vanpoucke)

Due to many differences in ldap structure, a simple mapping system saved in settings / xml files is not enough to parse an ldap record to a chamilo users. In some cases very specific parse methods are needed like loops etc.

#5 - 22/09/2010 15:06 - Sven Vanpoucke

- Priority changed from High to Low
