<b>Description</b>			
1. When adding a forum TWICE to the same Course, the following error occurs if you want to open the Forum in that Course:  Fatal error: Undefined class constant 'ACTION_MOVE_DOWN' in M:\wamp\www\Chamilo2\application\lib\webclms\tool\forum\component\browser.class.php on line 317			
2. Maybe this mistake ( by user ) can be countered by showing a warning?

This is just a bug when two forums (even if they are different) are added to the application. Then the move up / move down component must be rendered. Has nothing to do with the fact that it's the same forum.
