Target version:	1.0.0	Spent time:	0.00 hour
Complexity:	Normal		
Description			
<p>To notice this very strange bug you'll have to follow my guidelines very closely. This is because this bug happens only after a new installation when you start using the platform. After some playing around the bug is disappeared.</p> <p>This is what you have to do to see the error message.</p> <p>After the installation: login with admin, go directly to education>courses.</p> <p>You'll get to see the courses that are added with the installation.</p> <p>You select a course: for example International Week 2011</p> <p>In the course you go directly to the Document tool.</p> <p>In the document tool you click Publish in the actionbar. Et voila a fatal error message occurs:</p> <pre>*Fatal error: Call to undefined method WeblcmsManagerCourseViewerComponent::set_right() in /home/.../application/lib/weblcms/tool/document/component/publisher.class.php on line 16*</pre> <p>The strange thing now is when you press the 'Refresh browser' (F5) about 5 times, the error disappears....</p> <p>Same thing: when you do some other stuff on the platform after a new installation before hitting the publish button in the document tool, you will never see this error....</p> <p>So I was very (un)lucky to see this one..... ;-)</p> <p>I'm going to try to find out why this is happening, I think it has something to do with tracking...</p>			

History

#1 - 12/10/2010 21:06 - Ludwig Theunis

Owkey found it.... ;-)

So it has something to do with a tracker. I watched the tracker table and found that tracking_visit_tracker has a new record for every click, or refresh.

When there are more then 10 records in this table the bug disappears, id=11.

When I delete the rows in this table, and I set the auto increment back to 1. The bug re-appears...

So for some reason the id of the tracking_visit_tracker has to be bigger then 10 to publish a document in the document module of the course....

#2 - 13/10/2010 08:39 - Sven Vanpoucke

We have found this bug yesterday as well. The function set_right does not exist anymore and should be deleted from that file. Good find though!

#3 - 13/10/2010 10:41 - Sven Vanpoucke

- Status changed from New to Needs testing

- Assignee set to Sven Vanpoucke

- % Done changed from 0 to 100

Fixed the set right bug in
