<b>Description</b> shared objects has three possible views over 3 categories <ul style="list-style-type: none"><li>• shared objects<ul style="list-style-type: none"><li>◦ Objects I share</li><li>◦ objects shared with me</li></ul></li></ul> <p>One would logically expect 'shared objects' to show both types of shares, but it shows only the objects shared with me. Now that the general category does not show all objects, it is of no use.</p>
