#### Description

I'm bluffed with the jQuery File Upload plugin: <https://github.com/blueimp/jQuery-File-Upload>

I think it would be incredibly great to include it into Chamilo 1.8.8 in the documents tool (at least) and maybe other tools later on (for other versions of Chamilo).

The plugin allows for multiple-files upload, which makes it complicated to integrated as is, but I'm sure there must be a single file upload setting somewhere.
