

Chamilo LMS - Feature #289

Uniform JQuery method to show image information

03/12/2009 17:52 - Carlos Vargas

Status:	Rejected - Abandoned	Start date:	03/12/2009
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2.0	Spent time:	0.20 hour
Complexity:	Normal	SCRUM pts - complexity:	20

Description

From observing the users, it seems like images are much more appreciated than long documentation pages for dynamic help. We could develop a feature that enables local documentation to be shown to the user as an image popup when he clicks on specific icons (question mark?).

The documentation images could be placed under a sub-directory under the images directory (main/img), to enable easy categorization.

But what about languages? English only?

Comment

The idea is to show it so well without text that there's no problem with languages. This being said, there will be a time where language problems appear, but we hope we will hold them long enough to wait for 2.0
