<b>Description</b>			
in create post/forum /announcement/.. the "Add Attachement" section takes too much space which force the user to scroll down to save eventhough in most cases the user doesn't add attachements			
solution:			
- makes the section collapsible			
- collase it by default			
- add visual clue - i.e. arrow - to show the section is collapsed			
- when clicking the visual clue/section title toggle section's visibility
