| <b>Assignee:</b>   |                   | <b>% Done:</b>         | 0%         |
| <b>Category:</b>   |                   | <b>Estimated time:</b> | 0.00 hour  |
| <b>Target version:</b>   | Backlog (default) | <b>Spent time:</b>     | 0.00 hour  |
| <b>Description</b>   |                   |                        |            |
| General user comment   |                   |                        |            |
| <ul style="list-style-type: none"><li>• too many clicks and page refresh for some activities</li><li>• program isn't focused around activities. That is it is somewhat difficult to do something like adding content to a course. You have to switch back to the repo, create content, publish it. The modularity of the software forces the user to switch between tasks and forces some administrative activities - i.e. manage categories, move objects, avoid name collisions, publish objects, etc. For "little" objects - i.e forum posts, announcements, etc, this is a bit too much work with many of those "small" objects that can't really be shared or reused anyway. At least most of the time.</li></ul> |                   |                        |            |
| For example:   |                   |                        |            |
| <ul style="list-style-type: none"><li>• add intro</li><li>• add announcement</li><li>• answer forum topic</li><li>• ...</li></ul>  |                   |                        |            |
| takes too much work  |                   |                        |            |

#### History

##### #1 - 04/03/2011 12:35 - Hans De Bisschop

So ... going to the announcement tool of a course, clicking publish, entering the announcement and confirming / publishing it is too much work? Somehow I get the feeling you're going about things in a different way. I presume this because of "You have to switch back to the repo, create content, publish it." which simply isn't true :)

That being said, some things really could / should be simplified.

##### #2 - 04/03/2011 12:51 - Laurent Opprecht

Right enough. This is kind of a meta comment which tries to aggregate together many more specific comments. So announcement is possibly not the best example.

A lot of those have to do with Course/Weblcm actually.

For example if you want to create an object from WebLcm, the "publish" screen happens a lot and in most cases you simply confirm without changing anything. That being said there is a patch already for that.

##### #3 - 01/04/2011 14:56 - Stefaan Vanbillemont

- Project changed from Chamilo LCMS Connect to Repository

- Category deleted (21)

##### #4 - 14/04/2011 15:33 - Stefaan Vanbillemont

- Target version set to 2.1.0

##### #5 - 13/01/2012 14:34 - Stefaan Vanbillemont

- Target version changed from 2.1.0 to Backlog (default)
