

Common - Bug #3204

When viewing a document with attachment, no link is displayed

04/04/2011 18:02 - Michael Hosdez

Status: Bug resolved	Start date: 04/04/2011
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: 2.1.0	Spent time: 0.00 hour
Complexity: Normal	
Description	
When viewing a 'Document' content object with a Word (.DOCX) file in it, the attachment is not displayed and you get a "core.php" download request.	
See attachment.	
This happens in the Repository, Portfolio, WebLCMS,	

History

#1 - 05/04/2011 09:53 - Sven Vanpoucke

Very specific case on one server. Trying to figure out what configuration issue is causing this.

#2 - 05/04/2011 12:50 - Stefaan Vanbillemont

- Project changed from Chamilo LCMS Connect to Applications

- Category deleted (30)

#3 - 14/04/2011 15:10 - Stefaan Vanbillemont

- Project changed from Applications to Common

#4 - 14/04/2011 15:16 - Stefaan Vanbillemont

- Target version changed from 21 to 2.1.0

#5 - 26/04/2011 14:19 - Nathalie Blocry

I used to have the same problem with pdf's but that has been solved now

#6 - 26/04/2011 14:33 - Anonymous

- Status changed from New to Assigned

- Assignee set to Anonymous

I cannot reproduce this scenario, on the stable line a genuine download occurs, with the valid name, on the dev line the portofio is messed up so no check possible.

Does this occur on the stable line with you? Try to update your code to the latest version and check if this still occurs.

#7 - 26/04/2011 14:33 - Anonymous

- Status changed from Assigned to Needs more info

#8 - 26/04/2011 16:02 - Michael Hosdez

- Status changed from Needs more info to Bug resolved

This issue is fixed (also with PDFs) in the latest code.
