#### Description

In the dropbox it was possible to disable to the possibility to exchange data between students. This to prevent the misuse of the platform to not become a repository for students to exchange a lot of data we don't want them to exchange, like:  
illegal mp3's, solution's of exam's, exchanging information during exam's etc...

For the moment they can use the share option to share everything in their repository to everyone.

There's no setting to disable this possibility, at least I didn't found one...
