Actually, if you want to nitpick on something like this, the correct indication should be MiB anyway. See <http://en.wikipedia.org/wiki/Mebibyte>

Another note on this: in French, the word "octet" is used, so using MB globally and language independently would be plain wrong anyway. For French, it's "Mo", or, using the correct 1024-base, "Mio".

- Project changed from Chamilo LCMS Connect to Repository

#4 - 17/06/2011 13:38 - Stefaan Vanbillemont

- Target version set to 2.1.0

#5 - 13/01/2012 14:34 - Stefaan Vanbillemont

- Target version changed from 2.1.0 to Backlog (default)

#6 - 02/07/2012 14:22 - Stefaan Vanbillemont

- Tracker changed from Usability to Translations

- Status changed from New to Needs testing

- Assignee set to Michael Hosdez

- Target version changed from Backlog (default) to LCMS 3

This should be fixed in the translations I guess

It's not a translation issue, after a check in the code it's a value gotten from PHP, see the code below:

Filename: \repository\content_object\document\php\lib\form\content_object.class.php

```
$post_max_size = (Filesystem :: interpret_file_size(ini_get('post_max_size')) < Filesystem :: interpret_file_size(ini_get('upload_max_filesize'))) ? ini_get('post_max_size') : ini_get('upload_max_filesize');
```

I suggest to add a translation variable to "add" another character for each language, "B" for dutch, "o" for french, etc.
