

Chamilo LMS - Feature #342

How about to add "Remember me"

03/12/2009 18:41 - Carlos Vargas

Status:	New	Start date:	03/12/2009
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	3.0	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?
Description			
How about to add "remember me" when I login?			

History

#1 - 12/03/2010 18:32 - Yannick Warnier

- Subject changed from How about to add "remember me" to How about to add "Remember me"
- Status changed from New to Assigned
- Priority changed from Normal to Low
- Target version changed from 1.8.7 to 1.8.7.1

So that would change your setting to **not close the session** when you close your browser? Why not, indeed... I'm saving this one for later.

#2 - 21/07/2010 19:16 - Yannick Warnier

- Target version changed from 1.8.7.1 to 1.8.8 stable

#3 - 06/02/2011 22:01 - Yannick Warnier

- Target version changed from 1.8.8 stable to 1.8.8.4

#4 - 25/07/2011 09:39 - Yannick Warnier

- Target version changed from 1.8.8.4 to 1.9 Stable

#5 - 14/03/2012 15:56 - Julio Montoya

- Status changed from Assigned to New
- Target version changed from 1.9 Stable to 1.9.2

#6 - 29/08/2012 19:03 - Julio Montoya

- Target version changed from 1.9.2 to 3.0

This will require a DB change in order to allow that behaviour

#7 - 30/08/2012 07:30 - Yannick Warnier

I don't think so. It should just be changing the time the cookie stays valid when starting a session. That would be in the main/inc/lib/chamilo_session.class.php::session_lifetime() function.

When checking the box, add a month or so to the cookie, hacking the end_time() function to check on \$_SESSION['extended_session'] or something like that (which you have to set after calling session_start()). At least I guess it should be enough. Given the fact that this library was rewritten (and this is definitely a good thing), it should be possible to "really" change the session lifetime by setting \$_configuration['session_lifetime'] to a very short time (like 2 minutes) and check if that works when adding a month (86400*31) to the session expiry.

I said that because maybe somebody don't want that feature. So you will need a config setting in order to turn it off

Ah, of course :-)

#10 - 19/09/2013 14:04 - Julio Montoya

The "Remember me" feature was already implemented in silex ~~search~~ search for RememberMeServiceProvider

#11 - 19/09/2013 17:21 - Yannick Warnier

This last comment is not very clear for somebody external. What you mean is "this was implemented in Chamilo 1.10 thanks to the integration of Silex", right?

No, what I meant is that this feature (remember me) was implemented in the **Silex** project as a service called RememberMeServiceProvider that plays with the SecurityServiceProvider (that we use in 1.10). The configuration of this service:

<https://github.com/fabpot/Silex/blob/master/src/Silex/Provider/RememberMeServiceProvider.php>

in Chamilo 1.10 is missing.

#13 - 19/09/2013 17:46 - Yannick Warnier

See, I knew you could make it clearer :-p
