<b>Target version:</b>	1.8.8.4	<b>Spent time:</b>	2.00 hours
<b>Complexity:</b>	Easy	<b>SCRUM pts - complexity:</b>	2

#### Description

This should be a really short patch...

If you create a sub-language, the form for the sub-language is empty, but it is assumed the isocode will be the same as the parent language ("en" for English, for example).

This could be extended to other fields of the form and already suggest something like:

- English custom
- english\_custom
- en

Alberto, feel free to take this one if you can solve it before Wednesday...

#### Associated revisions

##### Revision 81fa79a9 - 21/07/2011 00:41 - Bryan Fuertes Malca

Added default form filling in sub language creation page - fixes #3711

#### History

##### #1 - 21/07/2011 00:39 - Bryan Fuertes Malca

- Status changed from New to Bug resolved
- Assignee set to Bryan Manuel Fuertes Malca
- % Done changed from 0 to 100

Fixed but could not add default original name because of QuickForm htmlentities filtering
