

Repository - Bug #3761

Error when downloading SWF in a learning path

29/07/2011 09:49 - Michael Hosdez

Status:	New	Start date:	29/07/2011
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Backlog (default)	Spent time:	0.00 hour
Complexity:	Normal		
Description			
<ol style="list-style-type: none">1. Create a document with a SWF file in attachment.2. Add the content object to a learning path.3. Open the learning path PREVIEW (in the Repository), go to the document and click download:			
Not Found The requested URL /chamilo/common/libraries/php/launcher/core.php was not found on this server.			
When a learning path is published in a course it works fine.
