Description

Hi,

in several selection list, e.g. to add members to a group, or members to a class, members are sorted by first name (prénom).

It's unusual to sort list by first name, it is easier for users to have the list sorted by second name (nom de famille).

Hello there!

I guess you are talking about the 2 big selects (like in task [#3784](#))?

If this is the case, yes, we need to improved the usability of those pages. There's a task in order to improve the usability using jquery see [#1801](#)
