Condition of testing :

p/p (session admin) can edit his account, change his role to teacher, BUT is not able to auto-assign admin rights.

This sounds ok to me.

Session admin did change to trainee role and loses his admin (session) rights.. So the administrator has to give again the role.

For me this is the behavior I would expect!

I try with a learner => Edit profile, no access to the role !

Note the "send email Yes/no" works well!!!! ;) )

PERFECT !
