

Chamilo LMS - Bug #3837

Backup and Import of course data into clean system will clutter course.

28/08/2011 11:19 - Jan Derriks

Status:	Bug resolved	Start date:	28/08/2011
Priority:	Normal	Due date:	
Assignee:	Julio Montoya	% Done:	100%

Target version:	1.9 Beta	Spent time:	0.28 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

Why would you want to import all shared user-files into a new system? That is what the current full backup+import of a course will do and it is hard to de-select all (hundreds?) shared folders.
There should be an easy way to do a backup+import without the userfiles.

Another thing that fails is an import of a backup with images. Those images will have URL-links to the old system and will pop up a "not allowed" from the old system.

The easy fix for this is to say: DON'T USE BACKUPS TO FILL A NEW SYSTEM. It will mess up your course.
Unfortunately, the ONLY reason we use the backups is when we start a new, clean install of Chamilo.

btw: what are these shared-user folders anyway?
