Description

In C1.8.8.2, when I create a folder in the dropbox tool (in sent files), I cannot send files from inside that folder. Also, when I create a new folder in Received files, I get sent to the sent files folder with the creation confirmation message.

ratified mentioned by Michela, is a bit annoying having to move the files to these folders created.

I don't know why we can create folders in the "sent folder", I think this functionality doesn't exist anywhere ... we should remove it?

We could create other kind of filters, by date, by user, etc

Too risky to change that tool because it has some old school code, I prefer to postpone this task when we do a cleanup of that tool ... someday?
