#### Description

I am unable to send email both in the forgot password section and the send email to new users section.

I am using google apps and so I have my mail.domainname.com pointed to google. I have edited mail.conf.php and I have tried various log-ins in both gmail and my domain. I am certain that I am using the correct usernames and passwords. Is there any other options in being able to send mail using php-mailer when my domain is connected to google apps? I also do not have a domain right now that is not connected to google so I am unable to test that issue.

I am currently using chamilo 1.8.8.4 and this issue has come up both in a fresh installation and an upgrade. I have also tested this in two different shared hosting providers. I am using PHP 5.2.17 and mysql 5.0.92 (5.1.56 on the other).

#### Associated revisions

##### Revision d28832d7 - 19/11/2009 18:10 - John Hinojosa

fixed - Add \"check box\" in question pool, issue #3883

##### Revision b4cdc367 - 12/09/2011 12:10 - Julio Montoya

Fixing api\_mail function see #3883

#### History

##### #1 - 10/09/2011 08:17 - Bas Wijnen

- File mail.patch added
- Status changed from New to Needs more info
- Priority changed from Normal to High
- Target version set to 1.9 Stable
- % Done changed from 0 to 80

The problem is that there is a check to see if the address is valid, and it is only used if it **isn't**. Obviously this is not what was intended. A (one-line) patch is attached.

##### #2 - 12/09/2011 12:05 - Julio Montoya

patch applied thanks for reporting
