### ajax.php download request after adding Calendar Day block

27/09/2011 10:13 - Michael Hosdez

<b>Status:</b>	New	<b>Start date:</b>	27/09/2011
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Backlog (default)	<b>Spent time:</b>	0.00 hour
<b>Complexity:</b>	Normal		

#### Description

When clicking the "previous day" or "next day" buttons immediately after adding the "Day" block on the Homepage, you get a download request for the ajax.php file.

When going to another page and going back to the Home page, the error is gone. The previous or next day is working well.

#### History

##### #1 - 13/01/2012 14:28 - Stefaan Vanbillemont

- Target version changed from 2.1.0 to Backlog (default)

##### #2 - 24/06/2012 21:33 - Michael Hosdez

In C3 you get the following message:

```
{"result_code":400,"result_message":"BadRequest","properties":[]}
```

This issue is still valid for the Day and Month calendar block.
