Description

Hi,

I'm having some problems with quiz's results.

When I sorted responses, some results are missing and the results display are not the same when I sort ascending and when I sort descending !

I obtain similar results, when I sort by First name, last name and date...

Get a look on this screenshot:

The situation is similar on release Chamilo 1.8.8.2 and 1.8.8.4.

Any idea ?

Thanks in advance,

Alain
