#### Description

Hi,  
I've got these errors when I upload a scorm package.

Dev message: please add the `c_id` field in this query or report this error in support.chamilo.org for tables `c_lp` and `c_lp_item`

But the package has been imported.  
(I've got other errors on scorm package, but it may be because of this one...)

Yes, I removed the hack I did in Database::query in order to add the "c\_id", so now for every query that doesn't included the "c\_id" (when using course tables) it will prompt that message (that message will be removed before the released).

I imported a scorm package and I don't see the message, this could be already fixed?
