Description

There are plenty of code in local.inc that actually belongs to the authentication plugins. While this may be not be the right time to do can we at least try to move that to the authentication plugins when opportunity arise?

On the same page there is a lot of code at the end of local.inc about login in user. This is at best awkward to use with people including the local.inc into other files for the sole purpose of login a user. This would be better if we could move that to its own library.

History

#1 - 23/04/2012 23:18 - Yannick Warnier

- Target version set to 1.9.2

OK, but moving to 1.9.1

#2 - 11/06/2012 12:21 - Laurent Opprecht

- % Done changed from 0 to 50

Some work done for key authentication

#3 - 02/08/2012 00:52 - Yannick Warnier

- Target version changed from 1.9.2 to 2.0

#4 - 31/01/2016 23:27 - Yannick Warnier

- Target version changed from 2.0 to 3.0
