

Chamilo LMS - Bug #4651

Denied access in documents tool in student view mode

Description

When using "View as student" (but registered as portal admin and teacher of the course), when I enter the documents tool (made invisible but still available through a link on another icon), I get a message saying I am not allowed: "Lo sentimos, no le está permitido acceder a esta página o su conexión ha caducado. Para volver a la página anterior pulse el enlace inferior o haga clic en el botón "Atrás" de su navegador."

This happens when no document or directory is visible, but it also happens when I make the "Images" directory visible.

When making the documents **tool** icon visible, it is OK (the student view shows the Images directory in the documents listing - no error message). This behaviour is wrong, as hiding the documents tool should have no impact on accessing it (it only hides the icon). -- Yannick_ (using Julio B's account)

We tried the exercises tool, and its behaviour is good: when hidden, it is still accessible. Good. Only the documents tool is failing.

The problem is at line 346 of document.php:

```
if ($tool_visibility == '0' && $to_group_id == '0' && !($is_allowed_to_edit || $group_member_with_upload_right  
s)) {  
    api_not_allowed(true);  
}
```

At line 345, the condition on tool_visibility == 0 is breaking the idea of being able to access the course. As the check is also on \$to_group_id, we assume it is meant to be related to groups. Is there a reason for this condition? Could we remove it if it has nothing to do with groups?

I can't reproduce the bug, maybe it was already fixed?

The problem seems to have disappeared, indeed.
