

Wiki - Bug #4909

Page not visible anymore when linked to existing pages

14/06/2012 11:43 - Michael Hosdez

Status:	New	Start date:	14/06/2012
Priority:	Normal	Due date:	
Assignee:	Michael Hosdez	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 3.1	Spent time:	0.00 hour
Complexity:	Normal		

Description

Page not visible anymore when linked to existing pages.

Scenario:

Create a wiki page with a link to another (not existing) page: [Page 2](#)

Now open the first created page > everything okay

Click the "Page 2" link and create the new page

Result: first page not visible anymore 'till you remove the second page or modify the link to another **not existing** page.

History

#1 - 06/07/2012 15:16 - Anthony Hurst

- Status changed from New to Needs more info

- Assignee set to Michael Hosdez

- Target version changed from Backlog (default) to LCMS 3.1

Do you have an example wiki that I could import? I don't seem to be able to make the sort of links you refer to.

#2 - 09/08/2012 12:22 - Michael Hosdez

Bug still valid in latest code.

It's easy to produce:

Go to a course >> Open Wiki

Create a wiki (and publish it)

Create a new page: "Page1"

Open Page1 and add a link to Page2: [[Page2]]

Click on the new link "Page2"

Because there is no Page2 you need to create that page

Now, after creating Page2, go back to Page1 ... empty!

#3 - 09/08/2012 12:23 - Michael Hosdez

- Status changed from Needs more info to New
