

Chamilo LMS - Feature #4925

Plugin for OLPC Perú for Squid config by course

18/06/2012 09:26 - Yannick Warnier

Status:	Feature implemented	Start date:	18/06/2012
Priority:	Normal	Due date:	
Assignee:	Yannick Warnier	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.9 RC1	Spent time:	0.10 hour
Complexity:	Normal	SCRUM pts - complexity:	?
Description			
The OLPC Perú project asked if we could include a small plugin to enable the setting of a Squid config file inside a Chamilo course.

olpc_peru_filter_na.png and olpc_peru_filter.png images need to be added

Otherwise an error will be shown in firebug

"NetworkError: 404 Not Found - main/img/olpc_peru_filter_na.png"

#4 - 13/07/2012 18:15 - Yannick Warnier

I think it would be better to modify the plugin.lib.php instead (because in this case I have added a feature to avoid showing the plugin in the course homepage, which should remove the need for a 64px image). I'll check that.

#5 - 13/07/2012 18:19 - Yannick Warnier

"NetworkError: 404 Not Found - main/img/olpc_peru_filter_na.png"

The location of this file here kind of implies that it loads it from the root of /main/img/... why would that be?

#6 - 13/07/2012 18:21 - Yannick Warnier

- Assignee changed from Yannick Warnier to Julio Montoya

I can't find that error anywhere in firebug... can you help me locate it?

#7 - 13/07/2012 18:23 - Julio Montoya

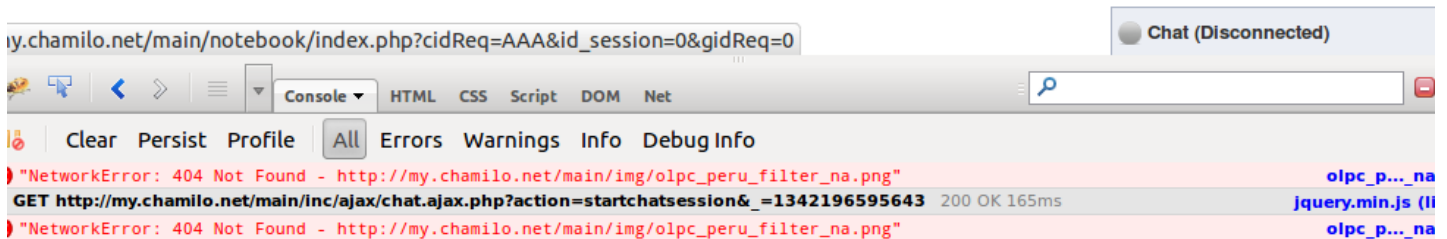

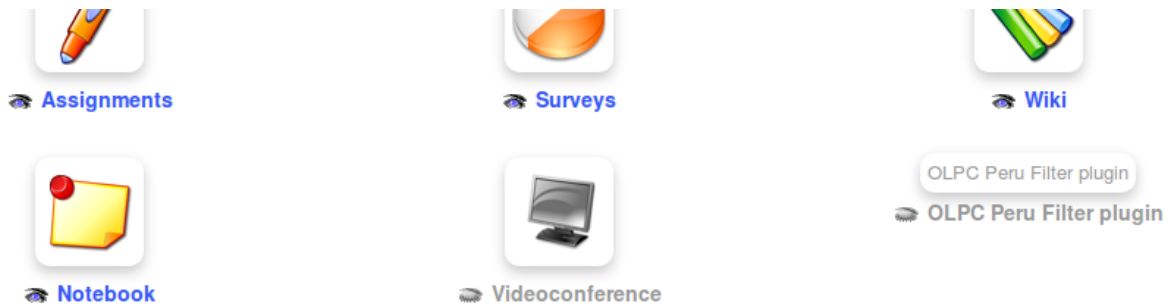

You can put the icon also in main/img/icons/32 or main/img/icons/64 we are using Display::return_icon to get the image

#8 - 13/07/2012 18:24 - Julio Montoya

- File olpc_bug.png added

- Status changed from Assigned to Needs more info

- Assignee deleted (Julio Montoya)

#9 - 13/07/2012 18:26 - Julio Montoya

The php code is located in the course_home.lib.php file 744

```
// Including Courses Plugins

// Including Courses Plugins
    // Creating title and the link

    if (isset($tool['category']) && $tool['category'] == 'plugin') {
        $plugin_info = $app_plugin->get_plugin_info($tool['name']);
        if (isset($plugin_info) && isset($plugin_info['title'])) {
            $tool_name = $plugin_info['title'];
        }
        $tool_link_params['href'] = api_get_path(WEB_PLUGIN_PATH).$tool['original_link'].'?.api_g
et_cidreq();
    }
```

#10 - 13/07/2012 18:27 - Julio Montoya

Remember that when you install the course plugin it also installs "the icon" in the tool table

#11 - 13/07/2012 18:27 - Yannick Warnier

You probably have something wrong or I didn't send something, but in short, you shouldn't see that tool appear there, because I modified the plugins system to avoid creating anything in the tools table.

I mistakenly "attached" my commits to task [#4796](#), so all commits relative to this plugin should be checked there.

#12 - 13/07/2012 18:28 - Yannick Warnier

Yannick Warnier wrote:

...because I modified the plugins system to avoid creating anything in the tools table.

Only if requested through an explicit parameter, of course :-)

#13 - 13/07/2012 18:29 - Yannick Warnier

Ok, got it. On course creation, it still gets created. My fault. Checking this right away...

#14 - 13/07/2012 18:42 - Yannick Warnier

- Assignee set to Julio Montoya

The latest commit should fix it (it redefines the course_install() method at the plugin level).

#15 - 20/07/2012 13:01 - Julio Montoya

Ok I'm going to test it

#16 - 20/07/2012 13:08 - Julio Montoya

- Assignee changed from Julio Montoya to Yannick Warnier

ok, no more OLPC icon in the course home seems ok to me.

#17 - 20/07/2012 16:28 - Yannick Warnier

- Status changed from Needs more info to Feature implemented

- % Done changed from 20 to 100

Thanks, closing.
