

Repository - Bug #4959

importTypeYouTube

18/06/2012 11:43 - dominique de guchtenaere

Status:	New	Start date:	18/06/2012
Priority:	Normal	Due date:	
Assignee:	Hans De Bisschop	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 3	Spent time:	0.00 hour
Complexity:	Normal		
Description			
importing a youtube via importtypeyoutube : I have to add the link of the youtube movie, but I get an error message: youtube object not available.			
Adding a link isn't the same as connecting to an external repository.			
This way of importing by just adding a simple link should be possible for Vimeo too.			

History

#1 - 20/06/2012 23:32 - Hans De Bisschop

- Status changed from New to Needs more info
- Assignee set to dominique de guchtenaere
- Target version changed from Backlog (default) to LCMS 3

Sounds like a configuration error on the test-platform? Was the YouTube object installed and is it active?

#2 - 21/06/2012 12:17 - dominique de guchtenaere

- Status changed from Needs more info to New
- Assignee changed from dominique de guchtenaere to Hans De Bisschop

it works! Thanks!

For the integration in a CO type Document:

mild suggestion: in comparison with the old CKeditor, it's more difficult to integrate a youtube movie in a document.
steps I did:

- create a CO type document
- title, description, create
- in CKeditor, I select Content Object button
- I select 3th tab ImporterTitle
- I select ImportTypeYoutube
- I add a link (long link of Youtube)
- I see the youtube movie + text
- I click edit and publish, I remove the text and then everything is removed. Problem is I don't see a frame of Youtube in the editor.

#3 - 02/07/2012 13:03 - Hans De Bisschop

Vimeo importer added.
