Target version:	Backlog (default)	Spent time:	0.00 hour
Description			
firefox			
http://c3dev.chamilo.org/index.php?application=weblcms&course=5&tool=document&go=course_viewer&browser=table&tool_action=publisher&repoviewer_action=imported_selector			
For a simple user not clear how this function works			
- you think 'hey, I can import a ZIP in my course'			
- you start the import of a selected ZIP			
- you get the overview of the content objects in the ZIP (but not the ZIP as a whole, which I expect as a simple user)			
- you want to select all items to publish - this doesn't work (see bug			
- but meanwhile the ZIP is already unpacked in the repository! (which you don't expect as a simple user)			
If importing a ZIP is not possible in the course, don't create this expectation?			

History

#1 - 19/06/2012 10:49 - Michael Hosdez

See also Bug [#4943](#)

#2 - 02/07/2012 13:57 - Stefaan Vanbillemont

- Status changed from New to Needs more info
- Assignee set to Anneleen Verckens
- Target version changed from Backlog (default) to LCMS 3

Importing a ZIP is possible if you use the Create tab and select the ZIP file. I understand there is a 'conflict' with the import tab and its functionality.

#3 - 04/07/2012 08:51 - Stefaan Vanbillemont

- Target version changed from LCMS 3 to Backlog (default)
