

Courses - Bug #4997

Link tool - 'show in frame' not working with same origin policy

18/06/2012 15:25 - Anonymous

Status:	Needs more info	Start date:	18/06/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Backlog (default)	Spent time:	0.00 hour
Complexity:	Normal		
Description			
When trying to display a link in an iframe, it doesn't work if the webpage has added the following HTTP header: X-Frame-Options: SAMEORIGIN (e.g. google.com). If this is the case you get an empty iframe which could be perceived as a bug by the user. Perhaps this could be checked in some way and a warning could then be displayed? Info: developer.mozilla.org			

History

#1 - 19/06/2012 10:32 - Stefaan Vanbillemont

- Target version set to Backlog (default)

#2 - 20/06/2012 14:59 - Sven Vanpoucke

- Status changed from New to Needs more info

- Assignee set to Anonymous

This is a html issue. We can not detect this without making an internal request to the webpage (= lots of overhead). The link you gave indicates that firefox will add an error message for this in the future. (When an attempt is made to load content into a frame, and permission is denied by the X-Frame-Options header, Firefox currently renders about:blank into the frame. At some point, an error message of some kind will be displayed in the frame instead.)
