

Repository - Usability #5048

Order of objects in standard view

25/06/2012 14:44 - Anonymous

Status:	New	Start date:	25/06/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Backlog (default)	Spent time:	0.00 hour
Description			
<p>I wonder what the logic (if any) is behind the standard order of objects in the list of objects in the repository. It is not based on type, title, description or date. It seems completely random, but it is the same each session!</p> <p>In Chamilo 2 the standard order is based on type, this column (icons) is no longer sortable in Chamilo 3. Perhaps this has lead to the apparent mishmash?</p> <p>Suggestion: order standard on date (recent first)</p>			

History

#1 - 02/07/2012 09:49 - Stefaan Vanbillemont

- Status changed from Assigned to New
- Target version changed from LCMS 3 to Backlog (default)
