Target version:	Backlog (default)	Spent time:	0.00 hour
Complexity:	Normal		

Description

The possibility of embedding content objects in a new object such as an announcements leads to some problems with particular objects:

- links: the links no longer work (some garbage is added to the link)
- rss-feeds: the object with an embedded feed is not viewable

History

#1 - 02/07/2012 09:49 - Stefaan Vanbillemont

- Target version set to Backlog (default)

#2 - 02/07/2012 13:19 - Anthony Hurst

- Target version changed from Backlog (default) to LCMS 3

An ASCII line feed (unicode #x0A, HTML entity %0A) is added to the end of a link.

#3 - 02/07/2012 14:04 - a b

- Assignee set to Anthony Hurst

Fixed the links problem, rss remains open

#4 - 03/07/2012 14:55 - Anthony Hurst

- Status changed from New to Needs more info

- Assignee changed from Anthony Hurst to Anonymous

RSS feeds display well when embedded in various content objects, like announcements. They do not, however display well in a Document. This is because it is not possible to supply css (styling) with a Document.

#5 - 04/07/2012 11:16 - Anonymous

- Assignee changed from Anonymous to Anthony Hurst

(CF. issue 5060)

As Rss cannot technically be used with documents, it should be removed from the possible objects to integrate in the case of documents. This would then solve this issue & the related 5060.

#6 - 04/07/2012 14:52 - Stefaan Vanbillemont

- Target version changed from LCMS 3 to Backlog (default)
