#### Description

On Chamilo installations using a subdirectory (i.e. [www.chamilo.org/elearning/](http://www.chamilo.org/elearning/)), the bbb plugin fails to link to the right directory.

In plugin/bbb/install.php and plugin/bbb/course\_install.php, the link to the bbb plugin has to be modified from ../../plugin/bbb/start.php to ../plugin/bbb/start.php.

This is likely to make the "normal" (root directory) installs fail, so it has to be checked thoroughly before applying (make sure that, with this change, it works both for root directory and subdirectory installs).

#### History

##### #1 - 09/08/2012 17:17 - Julio Montoya

- Status changed from New to Needs testing
- Assignee set to Yoselyn Castillo

Works fine for me. Tested in chamilo 1.9 in a local installation with this URL

<http://localhost/chamilo10/chamilo10/>

##### #2 - 11/08/2012 15:38 - Yoselyn Castillo

- Status changed from Needs testing to Bug resolved
- Assignee deleted (Yoselyn Castillo)

It works fine for me
