<b>Description</b>			
<p>Is it possible to give the "shared by me" map the same possibility as the "shared with me" map. I am missing the option to add and manage categories in this item of the repository.</p> <p>I know that what you share, you already can manage in your own repository. But if you want to know quickly with who you have shared all those objects than you have to do this through the "shared by me" map. So when you have shared a lot of object, paths, etc and couldn't categorise all of them it will become chaotic and cluttered.</p> <p>I think that this extra option will give a more user friendly usage of the repository.</p>
