Description

We're trying to setup Chamilo 3, and so far can't get past the install.

server setup:

Linux Debian squeeze 5.1.63

php5.3.3-7 (problem also occurs with php5.3.17)

mysql 4.1.63

- downloaded hg clone for chamilo 3 stable
- used phing get-all command
- checked that requirements are met
- (problem occurs if installing just the core or with extra packages)
- after clicking install this is displayed:

```
-----  
#0 /home/cvo/var/public_html/chamilo3/install/php/lib/install_manager/component/inc/wizard/content_object.class.php(47):  
core\lynx\package\Package::get('repository\cont...')

#8 /home/cvo/var/public_html/chamilo3/install/index.php(47): common\libraries\Application::launch('install', NULL)  
#9 {main}
```

Any help is greatly appreciated - - we have an eager group of teachers waiting to start testing it out.

Many thanks,
-Shaun

Just to give some more info - here's a snapshot of our php info: <http://www.cvoleuven.be/site/uploads/chamilo3-phpinfo-snapshot-2012-10-05.html>
As you can see we've now tried installing every php extension known to man, but this has had no effect.
