

Chamilo LMS - Feature #5635

When posting an announcement we don't see groups that have 0 members. Why not adding these groups in grey.

Description			
<p>Hi,</p> <p>- I have a course with some groups, some are filled, other are empty</p> <p>- I want to publish an announcement, I've got the list of groups, and I don't see in the list empty groups.</p> <p>It is quite disturbing, because a teacher don't see all groups he has created. I know he cannot publish an announcement for empty groups, but before we have the number of user in each groups.</p> <p>The group list, is a group list, I think we don't have to subjectively shorten or filter this list because we think it's going to be better or easier.</p> <p>In a group list, I think we have to see all groups otherwise we impose teacher to wonder why some has disappeared</p> <p>"Ok, this is my group list, but I don't recognize it... it misses some of my groups... a bug ? why ? I check... .. oh, these groups are empty ? may be that's why I don't see them in the group list ? don't have time to think about it..."</p> <p>In this case, I think we could display empty group in the list, and showing the number of users in the group (see #5634) and add a visual effect for empty groups (display it in grey instead of black) or add a checkbox "Hide empty groups".</p> <p>Did you have complain about the fact that empty group were visible in this group list ?</p> <p>Sometime "The perfect is the enemy of the good."</p> <p>What do you think ?</p>
