Description

Hi,
in document tool, when they want to add a document, teachers are very found of the "Clic or drag and drop files here to upload them" feature.

But there isn't advanced option in this feature like in the simple document upload for the action to do if file already exists.

Advanced settings

Options

Uncompress zip

If file exists:

Do nothing

Overwrite the existing file

Rename the uploaded file if it exists

And after upload file(s) when don't know if existing file has been overwritten or not

History
