Description

Hi,

I've got e test and a "Fill blanks" question.

I cannot put texts with square brackets in my text, because if I do so, it became a txt to find.

Most advanced teachers add [and] to replace bracket for display, but they have to re-replace it each time the edit the question.

May be we could add an option that allow user to other characters than [and] to define word to find in Fill blanks questions.
