

Chamilo LMS - Bug #5705

Security::check_abs_path function has \$_configuration['symbolic_course_folder_abs'] not set

07/11/2012 11:30 - Julio Montoya

Status:	Bug resolved	Start date:	07/11/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.9.6	Spent time:	0.10 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

It seems that this value is not set in the main/inc/conf/configuration.php

Somebody still use it?

`$_configuration['symbolic_course_folder_abs']`

```
public static function check_abs_path($abs_path, $checker_path) {
    global $_configuration;
    if (empty($checker_path)) { return false; } // The checker path must be set.

    $true_path = str_replace("\\", '/', realpath($abs_path));
    $found = strpos($true_path.'/', $checker_path);

    if ($found === 0) {
        return true;
    } else {
        // Code specific to courses directory stored on other disk.
        $checker_path = str_replace(api_get_path(SYS_COURSE_PATH), $_configuration['symbolic_c
course_folder_abs'], $checker_path);
        $found = strpos($true_path.'/', $checker_path);
        if ($found === 0) {
            return true;
        }
    }
    return false;
}
```
