

Chamilo LMS - Feature #5716

Enable exercise report by category

12/11/2012 08:45 - Yannick Warnier

Status:	Feature implemented	Start date:	12/11/2012
Priority:	High	Due date:	22/11/2012
Assignee:	Julio Montoya	% Done:	100%
Category:	Exercises	Estimated time:	2.00 hours
Target version:	1.9.4	Spent time:	1.85 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

In the report (the detailed screen with the score for each question, as viewed by the student after the test, or by the teacher when he comes to review it), show a table like the following between the total score (now the first section to appear) and the result of the first question.

I'm assuming there are 10 questions in the test (max score 1 for each one) and 3 categories, and that 3 questions are in no category at all:

Categories	Absolute score	Relative score
Categ. A	6/6	100%
Categ. B	3/6	50%
Categ. C	4/5	80%
None	1/3	33%
Total	14/20	70%

If a question is inside 2 different categories, then it is counted twice into this table. This should be possible to integrate into Chamilo 1.9.4.

Attaching something similar to what I want in terms of presentation (although we want to show the score).

#2 - 20/11/2012 14:06 - Julio Montoya

For showing the "pass", "failed" the "pass percentage" setting must be "on"

#3 - 20/11/2012 15:55 - Eric Petitemange

Could you please consider people using sessions, as score and progress is not shown the same way ?

Thanks in advance.

Actually, I don't need the pass/fail stuff, just the percentage as in the table at the beginning. The screenshot was an idea of the presentation, nothing more.

We're only speaking about exercises here, so there is no "progress" of any kind (for now) related to this task, and I think the exercises results are show the same way in and out of session... aren't they?

For a number of reasons, including the recent success of the Chamilo certification program, we will need to have a new mode of report, which **only** shows the table with a final global score, but **doesn't** show the details of points obtained for each question.

The new report type should say (next to the "exam mode: show nothing"):

`$FeedbackTypeExamFinalScore = "Exam mode with final score: show only the final score, with categories if available.";`

This mode should show the table described above in this task, which I will update right now to reflect the "Total score" line.

This setting does not match the same thing you want?

"Practice mode: Show score only"

we could just edit the lang var: "Show score only, with categories if available".

No, the "Show score only" shows the score for each and every question. I don't want any question to be shown, but **only** the categories and total (the table you have in your screenshot is excellent, I just need it to appear **without** the questions at the bottom).

I guess you are saying that you want just a new option in the "Show score to learner" setting and not in the "Feedback" setting?

Because you're mixing both concepts here ...

Indeed. I didn't have them clearly in mind. Yes, in the "show score ..." section.

I did a test and when the "show score only" is **on** I only see the final score.

I'm OK for updating the label for the "Show score only" to "Show score only, by category if at least one is used"

I'm satisfied with the current results (they're very nice) :-)
