Category:	Installation / Migration	Estimated time:	0.00 hour
Target version:	3.0	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

Through [#5783](#), it has come to our attention that the UserManager::delete_user() method didn't include a mechanism to delete tasks from users who have been removed from the system.

As such, we have updated work.lib.php (see [#5783](#)) to include a JOIN on the user table. This, however, is inefficient. Now that [#5783](#) has implemented the right mechanism in delete_user(), remove all the "ghost" assignments from the c_student_publication table during the upgrade from 1.9 to 1.10.

Then remove the check on the user table from work.lib.php.
