<b>Description</b>			
See <a href="https://github.com/php-fig/fig-standards/blob/master/accepted/PSR-2-coding-style-guide.md">https://github.com/php-fig/fig-standards/blob/master/accepted/PSR-2-coding-style-guide.md</a>			
phpdoc and pear are already using that standard			
<a href="http://www.php-fig.org/">http://www.php-fig.org/</a>			

### History

#### #1 - 13/01/2013 15:35 - Yannick Warnier

We've already got most of it right (mostly because PEAR2 conventions are part of the PSR rules survey).

The most difficult part will be th classes renaming (as a consequence of respecting PSR-2, we have to respect PSR-1 and PSR-0 as well)

<https://github.com/php-fig/fig-standards/blob/master/accepted/PSR-0.md>

This goes along with the bracket sign having to go on the next line.

#### #2 - 14/01/2013 03:02 - Yannick Warnier

- Category set to System

- Target version set to 2.0

#### #3 - 14/01/2013 10:04 - Julio Montoya

<https://github.com/php-fig/fig-standards/blob/master/accepted/PSR-1-basic-coding-standard.md>

3. Namespace and Class Names

Class names MUST be declared in StudlyCaps

4.3. Methods

Method names MUST be declared in camelCase().

and so on

#### #4 - 14/01/2013 10:09 - Julio Montoya

phpstorm has built in psr1-psr2 standards

<http://blog.jetbrains.com/webide/2012/11/more-php-formatting-options-and-bundled-code-styles-for-ps/>
