You know that this isn't really "unused", right?

The userinfo stuff serves as "user extra fields" inside a course. That is, a teacher can (or could) define new user fields just inside his course to keep more details about his students. He can then see those details from the users list.

I'm not sure if anybody still uses it, but the last time I wanted to remove that code (it's probably still in the dokeos commits history) I got a few people very angry at me.

#3 - 28/11/2016 03:07 - Yannick Warnier

- Category set to Database & API changes

- Status changed from New to Needs more info

- Assignee set to Yannick Warnier

- Priority changed from Normal to High
